CONTENTS

VOLUME 9, ISSUE Nos 1–6

ISSUE NO. 1 January–February

An Efficient Protocol for Providing Integrated Voice/Data Services to Mobiles over Power-Limited Satellite Channels: S. K. Bose 1

Frequency and Time Stability of GPS and GLONASS Clocks: P. Daly, I. D. Kitching, D. W. Allan and T. K. Peppler 11

The Effect of Channel Errors on the Performance of a Contention-based TDMA Protocol: L.-S. Liang and J.-F. Chang 23

Payload Design for a Switchboard in the Sky: W. Berner and F. Ortwein 37

BOOK REVIEW 49

ISSUE No. 2 March–April

The German DFS and TV-SAT Satellite Control Centre in Usingen: B. Altmann, A. Damiano and G. Piani 51

The Search for Optimized Shaping Filters Suitable for VSAT Systems: M. Tomlinson, R. Stevens and D. Saunders 65

Satellite Antenna Depointing Originating from Attitude Control and Station Keeping Specifications: M. Bousquet and G. Maral 85

Optimum Processing of QPSK Signals for Site Diversity: H. Sandström 93

Modelling Direct Sequence Pseudonoise (DSPN) Satellite Reception with Directional Antennas in the Dense Scatterer Mobile Environment: F. Amoroso and W. W. Jones 99

Adapted Packet Speech Interpolation: R. C. Lacovara and D. R. Vaman 111

Analysis and Correction Techniques of Doppler Shift for Non-geosynchronous Communication Satellites: E. Vilar and J. Austin 123

ISSUE No. 3 May–June

A New Generation of Modems for Power Efficient Radio Systems: K. Feher and M. Sato 137

Bandwidth Compressive 64-state SQAM Modems for Non-linearly Amplified SATCOM Systems: J. S. Seo and K. Feher 149

Intermodulation in Multiple Fixed Beam Distributed Amplifier Phased Array Antenna Systems: K. G. Johannsen and J. Hintze 155

Effects of Fade Distribution on a Mobile Satellite Down-link and Up-link Performance in a Frequency Reuse Cellular Configuration: K. Boutin, M. Lecours, M. Pelletier and G. Y. Delisle 167

Comparison of the Simulated Performance of a VSAT Satellite Link with Measurements: M. Mwanakatwe, M. J. Willis and B. G. Evans 171

Abstracted/indexed by Cambridge Scientific Abstracts, Current Contents, Engineering Index, Information Reports & Bibliographies, INSPEC, SCI-SEARCH Database, Telecommunications Abstracts and Telescope Networks

ISSUE No. 4 July–August

Carrier Recovery and Inter-burst Interference in a Symbol-synchronous TDMA System: R. A. Harris and M. Yarwood 197

Low Earth Orbit Satellite Systems for Communications: G. Maral, J.-J. de Ridder, B. G. Evans and M. Richharia 209

Error Probability of *M*-ary FSK with a Limiter–Discriminator Detector in Satellite Mobile Channels: I. Korn 227

ISSUE No. 5 September–October

(Special Issue on ISDN. Guest Editor: W. W. Wu)

Editorial 239

ISDN and the Digital Satellite Revolution: J. N. Pelton 241

Unified Approaches to Integrated-service Networks—Burst and Fast Packet Switching: T. B. Maples and T. Suda 247

Global Corporate Communications with Integrated Services Digital Networks: C. Chan and J. M. Eng 267

The ISDN U Interface and Transceiver: R. J. Borns 277

Survey of Switching Techniques in High-speed Networks and Their Performance: Y. Oie, T. Suda, M. Murata and H. Miyahara 285

Video and Image Application on Narrowband and Broadband ISDN: R. Dewitt, J. Ramasastry, K. Kim and P. Li 305

Architectures for BISDN Networks: A Performance Study: X. Qian, S. Wakid, D. Vaman and D. Cypher 313

Unified Alignment of ISDN-relevant Information Communications Services/Applications Through a Cubic Framework: N. Shimasaki 329

Optimal Policies for Integrating Heterogeneous Services on ISDN Channels: O. El Dessouki, H. Baraka and S. El Sayed 339

A Promising Application for Broadband ISDN: Hypermedia Teleconference: K. Shimamura, S. Masaki and H. Tanigawa 355

ISDN Frame Relay and its Congestion Control: R. Bhardwaj and B. Jabbari 363

ISSUE No. 6 November–December

Required Protection Ratios for Co-frequency PAL FM TV Transmissions: M. Harverson, J. Dutronc, W. Dobbie and B. R. Court 381

Guidelines for a Preliminary Dimensioning of a Transaction-oriented VSAT Network: T. Zein, G. Maral and B. Jabbari 391

Fault Tolerance of On-board Digital Signal Processing Circuits: K. Raghunandan, F. P. Coakley and B. G. Evans 399

Satellite Link Performance for an SS-TDMA Experiment via Olympus: Q. Islam, M. S. Mashmoud and B. G. Evans 415
